

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Claim 1 (Original): A method comprising:

transmitting an image containing text in a first language over a network; and
receiving a translation of the text in a second language over the network.

Claim 2 (Original): The method of claim 1, wherein the image is a second image, the method further comprising:

AI capturing a first image containing the text in the first language;
receiving instructions to edit the first image; and
editing the first image to generate the second image in response to the instructions.

Claim 3 (Original): The method of claim 1, further comprising displaying the image.

Claim 4 (Original): The method of claim 1, further comprising displaying the image and displaying the translation of the text in the second language simultaneously.

Claim 5 (Original): The method of claim 1, further comprising establishing a wireless connection with the network.

Claim 6 (Original): The method of claim 1, wherein the image is a first image containing first text, the method further comprising:

transmitting a second image containing second text in the first language over the network; and

receiving a translation of the first text and the second text in the second language over the network.

Claim 7 (Original): The method of claim 6, further comprising transmitting the first image and the second image over a network in response to a single command from a user.

Claim 8 (Original): The method of claim 6, further comprising displaying one of the translation of the first text and the translation of the second text in response to a command from a user.

Claim 9 (Original): The method of claim 1, further comprising compressing the image.

Claim 10 (Original): The method of claim 1, further comprising receiving the image from an image capture device.

AI
Claim 11 (Original): The method of claim 1, further comprising prompting a user to provide additional information comprising at least one of an account number, a password, an identification of the first language, an identification of the second language, a dictionary and a server location.

Claim 12 (Original): The method of claim 1, wherein the network comprises at least one of a wireless telecommunication network, a cellular telephone network, a public switched telephone network, an integrated digital services network, a satellite network and the Internet.

Claim 13 (Original): A method comprising:
receiving an image containing text in a first language over a network;
translating the text to a second language; and
transmitting the translation over the network.

Claim 14 (Original): The method of claim 13, further comprising extracting the text from the image with optical character recognition.

Claim 15 (Original): The method of claim 13, further comprising receiving a specification of the first language.

Claim 16 (Original): A device comprising:

an image capture apparatus that receives an image containing text in a first language;

a transmitter that transmits the image over a network; and

a receiver that receives a translation of the text in a second language over the network.

Claim 17 (Original): The device of claim 16, further comprising a display that displays the translation.

AI
Claim 18 (Original): The device of claim 16, further comprising a display that displays the translation and the image simultaneously.

Claim 19 (Original): The device of claim 16, further comprising a controller that edits the image in response to the commands of a user.

Claim 20 (Original): The device of claim 16, further comprising an image capture device that supplies the image to the image capture apparatus.

Claim 21 (Original): The device of claim 20, wherein the image capture device is a digital camera.

Claim 22 (Original): The device of claim 16, further comprising a cellular telephone that establishes a communication link between the device and the network.

Claim 23 (Original): A device comprising:

a receiver that receives an image containing text in a first language over a network;

a translator that generates a translation of the text in a second language; and
a transmitter that transmits the translation over the network.

Claim 24 (Original): The device of claim 23, further comprising a controller that selects the translator as a function of the first language.

Claim 25 (Original): The device of claim 23, further comprising an optical character recognition module that extracts the text from the image.

Claim 26 (Original): A system comprising:

AI
a client device having an image capture apparatus that receives an image containing text in a first language, a client transmitter that transmits the image over a network to a server and a client receiver that receives a translation of the text in a second language over the network from the server; and

the server having a receiver that receives the image over the network from the client, a translator that generates a translation of the text in the second language and a transmitter that transmits the translation over the network to the client.

Claim 27 (Original): The system of claim 26, the server further comprising an optical character recognition module that extracts the text from the image.

Claim 28 (New): A method comprising:

capturing a first image containing text in a first language with an image capture device;

generating from the first image a second image containing the text in response to a command from a user,

transmitting the second image over a network;

receiving a translation of the text in a second language over the network; and

displaying the second image and the translation.

Claim 29 (New): The method of claim 28, further comprising establishing a wireless connection with the network.

Claim 30 (New): A method comprising:

AI receiving an image containing text in a first language over a network;
extracting the text from the image with optical character recognition;
receiving a specification of the first language;
translating the text to a second language; and
transmitting the translation over the network.

Claim 31 (New): The method of claim 10, wherein the image capture device comprises a digital camera.
